## Function of »Cool Injection-Plus«

»Cool Injection-Plus« channels the coolant - emulsion, oil, MMS, cryogenic - targeted through the open cutting edge of the PCD insert directly below the produced chip.

The combination of the »Cool Injection« cooling system (pat.) and the »Plus« chip-breaker developed by the **AUDI AG** guarantees a safe, controlled and efficient machining of aluminium, especially in the automobile and component supplier industries, e.g. all around the engine block.

Maximum service life, extreme high cutting data and infeeds are obtained, as well as perfect surface finish and component accuracy, including high performance (HPC) and up to 50 % and more reduction of cycle time.

PCD cutters with »Cool Injection-Plus« are delivered completely assembled and balanced with the adapter of your choice and can be mounted immediately on the machine without adjustment expenditure.

LACH DIAMANT, the pioneer among the manufacturers of PCD tools since 1973 again presented a technical innovation (pat.) at the IMTS in Chicago and AMB in Stuttgart 2014.

## »Cool Injection« with chipbreaker »Plus« for innovative aluminium machining

- ◆ High Speed Cutting (HSC)
- ◆ High Performance (HPC),  
because the tool is designed with a maximum number  
of cutting edges as multiple end mill
- ◆ maximum feed rates up to 40.000 mm/min.
- ◆ maximum depth of cut possible
- ◆ cycle time reduction of 50 % and more possible
- ◆ targeted chip breaking prevents chip accumulation  
in delicate components
- ◆ maximum tool life,  
because the chips do not have to be „cut“ several times
